Cybersecurity certification today

- Increasingly crowded marketplace
- No real governing body outside of 85:70
- Focused on a narrow market (govt./military)
- Hyper-specialized offerings are the norm
- No easy pathway for IT workers to get into security

Building a better path

- Help organizations make people a central part of their cyber-security strategy
- Tap into a ready pool of Network Admin talent for cyber-security resources
- Build “organizational cyber-capability” by empowering employees to care about security
